

Before the
Federal Communications Commission
Washington, D.C. 20554

PR Docket No. 91-258

In the Matter of

Ohio Public Safety Plan

ORDER

Adopted: February 6, 1992; Released: February 13, 1992

By the Chief, Private Radio Bureau and the Chief Engineer:

1. On April 25, 1991, Region 33 (Ohio) submitted its public safety plan to the Commission for review. The plan sets forth the guidelines to be followed in allotting spectrum to meet current and future mobile communications requirements of the public safety and special emergency entities operating in Ohio. On May 30, 1991, Ohio filed revisions to the plan, based on conversations with the Commission's staff.

2. The Ohio plan was placed on Public Notice for comments on August 30, 1991. 56 FR 46181 (September 10, 1991). The Commission received comments from the Indiana Region 14 Public Safety Planning Committee (Indiana) and reply comments from the Ohio Regional Planning Committee (Ohio).

3. In reviewing Ohio's plan, Indiana located 28 conflicts in Ohio's frequency allocation tables involving areas bordering Indiana. Indiana's concerns were brought to the attention of Ohio and the two regions resolved the frequency allocation conflicts.

4. We have reviewed the plan submitted for Ohio and find that it conforms with the National Public Safety Plan. The plan includes all the necessary elements specified in the *Report and Order* in Gen. Docket No. 87-112, 3 FCC Rcd 905 (1987), and satisfactorily provides for the current and projected mobile communications requirements of the public safety and special emergency entities in Ohio.

5. Therefore, we accept the Ohio Public Safety Radio Plan. Furthermore, licensing of the 821-824/866-869 MHz band in Ohio may commence immediately.

FEDERAL COMMUNICATIONS COMMISSION
